

Climate Resources

Your Ecological Footprint!

There are lots of carbon footprint calculators out there on the world wide web, some of which give you an idea of your ecological impact based on some questions. Below are details of some of them.

www.myfootprint.org

This is a simple, 16 question ecological footprint calculator that gives the person using it their eco-footprint in relation to the average in their country and also in relation to the whole world.

www.carboncalculator.com

This carbon calculator gives an idea of the amount of carbon the person putting their information into the calculator is producing through their lifestyle. It gives ideas and information on how to reduce the amount of carbon being produced by individuals and families.

Check out the Every Action Counts website (www.everyactioncounts.org.uk) for more details on individual and group actions you can take to reduce your own and your groups ecological footprint.

www.quakergreenaction.org.uk

Check out the Quaker Green Action website and look for: *Walk Cheerfully, Step Lightly: 100+ ways to green your life*. This publication includes a carbon calculator as well of lots of ideas for taking green action.
