## Climate Change Tracker

The Cooperative Bank have teamed up with the UK Climate Impacts Programme (UKCIP) and have released a climate change tracker enabling you to see the potential effects of climate change in your region of the UK over the next century.

Visit [climatechangetracker.com](http://climatechangetracker.com) to check out the climate change tracker and see what the summer and winter rainfall might be in your part of the country in 2020, 2050 and 2080. The website also has tips on making small differences to help combat climate change.

See how summers will get warmer and drier and winters will get wetter and what predicted sea level rise might be in different parts of the country as well as temperature changes.
